Seminar Mission

CISM: Advanced Group Crisis Intervention training program is designed to present the more advanced elements of a comprehensive, systematic and multi-component crisis intervention curriculum.

The two day course prepares participants to understand a wider range of crisis intervention services including pre and post incident crisis education, significant other support services, on-scene support services, crisis intervention for individuals, demobilizations after large scale traumatic incidents, small group defusing and the group intervention known as Critical Incident Stress Debriefing (CISD).

The CISM: Group Crisis Intervention course specifically prepares participants to provide several of these intervention, specifically demobilizations, defusings and the CISD. The need for appropriate follow up services and referrals when necessary is also described. Considerable evidence gathered to date strongly supports the multi-component crisis intervention strategy, which is discussed in this course.

About the presenter

Carol Staben-Burroughs is a Licensed Clinical Professional Counselor in private practice in Bozeman, MT for 25 years. She is an instructor at Montana State University in the Dept of Education, Health and Human Development. Carol is a past president of the American Mental Health Counselors Association and the Montana Clinical Mental Health Counselors Association. She is a trainer for the International Critical Incident Stress Foundation and the Montana Law Enforcement Academy. She has been an active volunteer in the Montana Critical Incident Stress Management Network since its beginning in 1992. Carol lectures on a wide variety of subjects and has a humorous, high-energy training style. Carol lives in Bozeman.

Advanced Group Crisis Intervention

Thursday, Oct. 1, 9:00 - 5:00
Friday, Oct. 2, 8:00 – 5:00

Designed to provide participants with the latest information on critical incident stress management techniques and post-trauma syndromes, the Advanced Group Crisis Intervention builds on the knowledge base which was obtained through the Group Crisis Intervention course and/or in publications. At the conclusion of this course, participants will have been exposed to specific, proven strategies to intervene with those suffering the ill effects of their exposure to trauma. Emphasis will be on advanced defusings and debriefings in complex situations.

This course is designed for public safety personnel: emergency medical services providers, firefighters, physicians, police officers, nurses, dispatchers, airline personnel, mental health professionals, chaplains, and disaster workers who are already trained in the critical incident stress management format. It will also be useful for those working extensively with traumatized victims in various walks of life.

This course requires previous training and experience. ICISF's "Group Crisis Intervention" should be viewed as a prerequisite.

Course Highlights

- Relevant research findings
- Managing complex group oriented crisis interventions
- Nature and importance of incident assessment
- Strategic intervention planning
- Comprehensive, integrated, systematic and multi-component CISM
- Concepts of enhanced group processes
- Line of Duty Death
- Significantly delayed interventions
- "Multiple incident CISD"
- Suicide of a colleague
- Small group crisis support sessions after a disaster
- Symbolic Debriefings
