Notice of data breach

Dear <First Name> <Last Name>:

We wanted to let you know about a recent event involving your information.

What happened?

We received a report on January 23, 2020 that data may have been exported by an unauthorized actor from an Anthem associate's email account on December 11, 2019. The unauthorized actor was able to export a small amount of data through malware, a type of malicious software. Anthem promptly quarantined the computer and eliminated the malware, however some data was taken by the unauthorized actor. If you are part of a self-insured group health plan, please note we have notified your group health plan and are notifying you on the plan's behalf as your information was involved.

What information was involved?

The following information may have been included: first name, last name, eligibility information, information related to healthcare services, ID number, and, in some cases, social security number.

What are we doing?

We have made every effort to find out what caused this issue and are taking steps to reduce the risk of this happening again. We have eliminated the malware on the impacted computer and are evaluating opportunities to enhance our technical safeguards. We are continuing to further educate our associates to be aware of suspicious emails so they know what steps to take if they receive one. We are committed to protecting the privacy and security of your protected health information (PHI).
