Dear <<Name>>,

I am writing to let you know about a serious matter that may affect your personal information. On November 18, 2015, a New West Health Services laptop computer was stolen from an off-site location when an employee was out of the office traveling on business. The computer contained electronic files with personal information from past and present New West customers. The computer was password protected, and **there is no evidence that any customer information has been accessed or misused.**

When the computer was stolen, we immediately launched an investigation to determine what information it contained. We notified law enforcement, and we continue to work closely with their criminal investigation. We also retained Navigant, a leading national computer forensics firm, to assist us in our investigation. The forensic investigation involved a lengthy process to identify what information was on the laptop and who may have been affected.

We believe some of your personal information may have been saved on the stolen computer. The computer contained an electronic database with information from customer insurance applications and/or premium payments. This information may include your name, address and Social Security number or Medicare claim number. The laptop may have also contained certain information related to your payment of the Medicare premium, including electronic funds transfer information (bank account number, account holder name, account type and bank routing number) or credit card information (card holder name, credit card account number, expiration date and CVV ("Card Verification Value") number). Additionally, the laptop may have contained certain health information, including your date of birth, medical history and condition, diagnosis and/or prescription information.

We take the security of your personal information very seriously and sincerely apologize that this incident occurred. In addition to conducting an extensive internal investigation and working with law enforcement, we are implementing additional security measures to help prevent this type of incident from occurring in the future. These include installing additional encryption on all New West laptops, enhancing education for our employees, and strengthening our data security policies and practices.

To reiterate, while we have no indication that the data has been used inappropriately, out of an abundance of caution and because we value the relationship we have with our members, we are offering you free credit monitoring and identity protection services through Experian's® ProtectMyID® Alert, which will promptly alert you to potential issues and help you resolve them. ProtectMyID Alert is being offered at no cost to you. Please see the additional information included in this letter for instructions on how to activate your complimentary one-year membership, and for a list of other steps you may wish to take to protect yourself.

We recognize you may have concerns and have established a call center to answer any questions. We are available Monday-Friday from 7 a.m. – 7 p.m. MST at 877-802-1399. We also have established a website to answer questions: <https://www.newwestmedicare.com/securityupdate>.

Contact information for the three national credit reporting agencies for the purpose of requesting a copy of your credit report or for general inquiries, including obtaining information about fraud alerts and placing a security freeze on your credit files, is as follows:

**Fraud Alerts:** You may want to consider placing a fraud alert on your credit report. An initial fraud alert is free and will stay on your credit file for at least 90 days. The alert informs creditors of possible fraudulent activity within your report and requests that the creditor contact you prior to establishing any new accounts in your name. To place a fraud alert on your credit report, contact any of the three national credit reporting agencies using the contact information listed above. Additional information is available at <http://www.annualcreditreport.com>.

**Credit and Security Freezes:** You may have the right to put a credit freeze, also known as a security freeze, on your credit file, so that no new credit can be opened in your name without the use of a PIN number that is issued to you when you initiate a freeze. A credit freeze is designed to prevent potential credit grantors from accessing your credit report without your consent. If you place a credit freeze, potential creditors and other third parties will not be able to get access to your credit report unless you temporarily lift the freeze. Therefore, using a credit freeze may delay your ability to obtain credit. In addition, you may incur fees to place, lift and/or remove a credit freeze. Credit freeze laws vary from state to state. The cost of placing, temporarily lifting, and removing a credit freeze also varies by state, generally \$5 to \$20 per action at each credit reporting company. *Unlike a fraud alert, you must separately place a credit freeze on your credit file at each credit reporting company.* Since the instructions for how to establish a credit freeze differ from state to state, please contact the three major credit reporting companies as specified below to find out more information:

Equifax Security Freeze  
P.O. Box 105788  
Atlanta, GA 30348

Experian Security Freeze  
P.O. Box 9554  
Allen, TX 75013

TransUnion Security Freeze  
Fraud Victim Assistance Department  
P.O. Box 6790  
Fullerton, CA 92834

You can obtain more information about the fraud alerts and credit freezes by contacting the FTC or one of the national credit reporting agencies listed above.
