Residence Inn Helena
2500 E. Custer Avenue
Helena, MT 59602
406-443-8010

TARGET AUDIENCE

This five-day crime scene course provides instruction in the identification, processing, preservation and recovery of physical evidence including: scene responsibilities, crime lab capabilities, scene equipment, scene and evidence photography, searching & measuring, biological & trace evidence, footwear & tire evidence, fingerprint processing and handwriting evidence.

Expectations of the public and the courts have risen dramatically over the last several years in the area of physical evidence collection and forensic identification. Working a crime scene is a "process" that involves a broad range of skills. With these issues in mind, the purpose of this course is to train crime scene personnel in the skills needed to identify, photograph, process, and preserve the crime scene and items of evidence found in them. The course is intended to provide a foundation for the future development of such expertise through experience and continued training.

Attendees will receive lecture and demonstrations along with participating in class discussions and performing practical exercises to demonstrate acquired skills.

SPECIAL NOTES FOR STUDENTS

Students should wear appropriate business casual clothing for practical exercises conducted both inside and outdoors. Clothing can be soiled or ruined during the practical exercises due to chemicals and/or working outside.

Students are asked to bring the following: Digital camera (digital SLR preferred) and instruction manual, lens, batteries for camera and flash, digital media, off camera flash and instruction manual, remote flash cord, tripod (if available), a flashlight, and basic latent processing kit.

These items are not required to attend class but students are strongly encouraged to bring them to enhance their learning experience.
